Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 10/584,326	Applicant(s) FRIBERG ET AL.	
	Examiner Michelle Lopez	Art Unit 3721	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 10 December 2007.

DETAILED ACTION

Election/Restrictions

Applicant's election without traverse of claims 1-4 in the reply filed on 12/10/07 is acknowledged.

Claim 5 is withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 12/10/07.

Claim Objections

Claim 5 is objected to because of the following informalities: claim 5 should be listed as (withdrawn). Appropriate correction is required.

Specification

The abstract of the disclosure does not commence on a separate sheet in accordance with 37 CFR 1.52(b)(4). A new abstract of the disclosure is required and must be presented on a separate sheet, apart from any other text.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4 are rejected under 35 U.S.C. 102(b) as being anticipated by Colangelo, III et al. (USPN 6,668,212).

Colangelo discloses the claimed method for tightening a screw joint to a desired target torque level by means of an impulse wrench comprising the steps of starting a

Art Unit: 3721

screw joint tightening process at a reduced power supply, i.e. starting air pressure; ascertaining angular displacement and retardation magnitude of a drive member via torque management system 100; increasing after the first delivered impulse the power supply, i.e. ramp rates; reducing the power supply when a predetermined part of the desired target torque level has reached, i.e. additional blow pressure; and shut-off the power supply as the target torque level has been reached as shown in fig. 2 (claim 1). The power supply is capable of being increased to an optimum value, i.e. maximum air pressure, after the first delivered impulse (claim 2, see fig. 2).

Colangelo also discloses a torque impulse wrench 104, a programmable control unit 106, a power supply 101, an impulse unit (not shown numerically), and an angle sensor via strain gage 109. The power wrench is pneumatically powered and the power supply comprises a valve 103a connected to the control unit 106 and arranged to vary the pressure air supply to the wrench.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. See the attached PTO-892 for related art.
